

Name: Susan Hall

Profession: Teacher

3rd generation Coloradan, Graduated from Metropolitan University
Major in Chicano Studies, Minor in History, Teacher's License

1st Concern: United States voting on sending \$95 Billion of weapons to Ukraine, Taiwan, & Israel
The US has supported Israel for the following with the \$95 Billion dollars:

- a genocide with killing 10's of 1,000's of innocent Palestinian citizens held in a fenced region and kept in an apartheid area called Gaza, Palestine until Israelis began to use violence to takeover much of the land and government
- Israeli's are also killing people in the West Bank, Palestine
- Killed over 10,000 children in schools, hospitals, neighborhoods & homes
- Killed over 140 journalists with vests that clearly mark who they are, many executed in the head
- Killed numerous Aid working citizens from the US & other countries by bombing them in a van which reported they were there, having the van clearly marked with their name
- Blocking humanitarian aid, food and not only blocking water, but purposefully poisoning it
- Acted as terrorists by Killing over 1,000 people with pagers that blew up citizens in Lebanon and then followed this up with bombs
- sent bomb to Iran as a terrorist action & blew up a leader there

The US needs funding for other things & should not be using their tax dollars for weapons and all the politicians that voted for it should be voted Out of Office. Some of the things we need funding for are the following:

- FEMA including for recently the Florida Hurricane Milton, and other extreme storms to come due to climate change, which will also be including fires and floods
- Providing new jobs that help prepare for weather concerns including more scientists, journalists, and addition laborers in the forests and mountains to care for dry ground cover & trees in the plains and mountains as well as ground caretakers for water front areas
- Certainly we should be providing free public transportation like trains and encouraging electric vehicles and paying adults not children for the elements needed to have electric batteries. Actually we need to make sure the US is providing fair trade for items so we don't cause labor abuses like we see in the Congo.
- Providing additional beds and food kitchens for homeless individuals both from US citizens and for migrants escaping loss of homes due to climate change environmental destruction of homes and professions.

Immigrants also move due hardship in countries like Venezuela with Sanctions, which should be removed. Interference needs to end in Haiti, Palestine-Israel & Russia-Ukraine where the US has been encouraging the US of might over negotiation and leaves so many people homeless, fatherless or parentless.

- There is a concern for there not being enough water to sustain the large high energy civilization humans have built. There are important issues with the Colorado River not having enough water which has been contracted for being delivered to for agricultural needs, trillion of gallons for

fracking oil and gas and to 24+ Native American Tribes -which should have a priority, 7 states and Mexico.

- Certainly what the leaders in the United States can be seen as models to the young people in Schools. Unfortunately in many way the US policies have demonstrated the decision of might makes right instead of negotiation is the best resolution.

-Gun Control and school shootings would be reduced if the US had Healthcare for All which included mental health like so many other countries. The US should also not be passing and promoting weapons around the world that can make their way back into our own country. Certainly there are many weapons for war that should be outlawed, including assault weapons in communities and parents who have guns need to have them locked up and think about their own and their children's stability.

- There should be better laws protecting citizens from contamination's like found in the contamination in Flint Michigan. Protection from the disasters happening, harsh prosecution when it happens, and immediate financial support for victims when it does happen.

-There needs to be accommodation for people who do not have access to internet news and have only mainstream news produced by a few very wealthy sources, which often report war criminal cover up lies and not have the ability to hear from Non Democrat or Republican Party members who are often less wealthy candidates and do not have a million dollars for commercials. Actually if a candidate commits to run for an office they should receive a stipend for their labor in getting their ideas out. Certainly a change should be made so that it will be easier to vote for candidates of different parties such as the Unity Party with the long time civil rights worker, Doctor Cornel West and his Vice President Dr, Melina Abdullah who have worked very hard their entire lives in both becoming knowledgeable about the world and in promoting a more inclusive society. Their integrity and the public trust should not be undermined by continuing to allow the politicians to be bribed or supported by foreign countries, big businesses, or a few very wealthy donors; so contributions should be limited in the amounts of contribution from parties and only be individuals in the area or district where the candidate is running, NO foreign funding. Of course Dr, West, myself & most of the Unity Party of Colorado candidates do NOT take foreign donations, especially from Israel, including AIPAC, DMFI, UDP, as do the following Colorado incumbents according to Trackaipac.com

- Caraveo (\$187,289).

- Pettersen (\$89,264)

- Neguse - (\$162,310)

- Degette - (\$73,725)

- Jason Crow (\$216,359)

- Doug Lamborn (\$300,512)

Harris (\$5,395,227)

It is easy to see they take funding because of their one sided stands, signatures & lies and especially Biden-Harris's complicity in ignoring the suffering caused by Israeli's international War Crimes.
